Read the following text, and then answer the questions below: (½ a mark each)

You have got something that is more complicated than the most powerful computer in the world. With this thing, you can experience the sight and smell of a flower, the memory of holiday, the pain when you hit your thumb with a hammer, the sound of your favourite singer, your thoughts and ideas. All these are possible because of a kilo of cells in your skull: the brain. Your brain controls everything you do. It receives information from your senses about conditions inside and outside your body. Your brain analyses this information with amazing speed and sends out messages that control your body. For example, when you put your hand in very hot water, you think "Oh! That hurts!" and you pull your hand from the water. This is what happens in your brain. Your hand sends a message to your brain: "Very hot!" and your brain immediately sends a message to your hand: "Take your hand out." Your brain also stores memories of things that happened to you in the past and this makes remembering easy. Finally, your brain controls your lungs, heartbeat, body temperature and the actions of your stomach. The brain cells create and send more messages than all the phones in the entire world. An average person uses only about 10% of the brain's capacity.

Q. 1 (Reading)

A) Read the following passage and answer the following questions:

Last night, the police finally caught the well-known hungry burglar in action in the house of TONY Green. The burglar was known in the area for breaking into the houses when the owners were either gone or asleep, and simply eating or taking whatever food he could find. Many victims simply woke up or returned home to find their cupboards and fridges completely empty. That wasn't the case for Tony, however, asleep when heard strange noises coming from the kitchen. He quietly went downstairs and, to his astonishment, saw a chubby man, of about forty, eating his chickens leftovers. He immediately called the police and asked them to come to his house as quickly as possible. The police told him not to panic and said that they would be there in no time. They also told him to stay in his room for safety reasons. I have heard stories of the hungry thief from friends and some neighbors who had been victims of his food raiding, so I was prepared, Tony says. Thankfully, the police arrived before the thief had time to finish my roast chicken. They also found about ten bags of food he was ready to take with him before he left.

People like Tim and Miranda Jones were not so lucky. They returned home once to find one of their front windows broken and their kitchen a mess. They said that it looked like a hurricane had passed through their house. There were scraps of food everywhere and pots and pans scattered on the floor. The police asked us if anything else was missing. We checked to see if our money and jewellery were gone. Fortunately everything was in its place. It was just the food he was after. We asked our neighbors if they had heard or seen but nobody had. The police confirmed the identification of the man by matching his fingerprints with some that had been left on food containers from his previous burglaries. After the burglar confessed, the police asked him why he had committed those crimes. He said that he was a homeless man who was simply hungry and preferred eating home cooked meals to stealing from the supermarkets . he also said that he never stole anything apart from food. He was charged with burglary and can face up to two years in prison.

Q. 1 (Reading)

A) Read the following passage and answer the following questions:

Last night, the police finally caught the well-known hungry burglar in action in the house of TONY Green. The burglar was known in the area for breaking into the houses when the owners were either gone or asleep, and simply eating or taking whatever food he could find. Many victims simply woke up or returned home to find their cupboards and fridges completely empty. That wasn't the case for Tony, however, asleep when heard strange noises coming from the kitchen. He quietly went downstairs and, to his astonishment, saw a chubby man, of about forty, eating his chickens leftovers. He immediately called the police and asked them to come to his house as quickly as possible. The police told him not to panic and said that they would be there in no time. They also told him to stay in his room for safety reasons. I have heard stories of the hungry thief from friends and some neighbors who had been victims of his food raiding, so I was prepared, Tony says. Thankfully, the police arrived before the thief had time to finish my roast chicken. They also found about ten bags of food he was ready to take with him before he left.

People like Tim and Miranda Jones were not so lucky. They returned home once to find one of their front windows broken and their kitchen a mess. They said that it looked like a hurricane had passed through their house. There were scraps of food everywhere and pots and pans scattered on the floor. The police asked us if anything else was missing. We checked to see if our money and jewellery were gone. Fortunately everything was in its place. It was just the food he was after. We asked our neighbors if they had heard or seen but nobody had. The police confirmed the identification of the man by matching his fingerprints with some that had been left on food containers from his previous burglaries. After the burglar confessed, the police asked him why he had committed those crimes. He said that he was a homeless man who was simply hungry and preferred eating home cooked meals to stealing from the supermarkets. he also said that he never stole anything apart from food. He was charged with burglary and can face up to two years in prison.

IV-Reading

Read the following passage and answer the questions below:

Good evening and welcome to today's World Weather report. Well, the weather's been even busier and even more exciting than usual, especially in North America and Asia! As we move into the early summer, temperatures have been rising more quickly than normal and this is producing dangerous weather conditions.

Let's start in South Asia with the Himalayas. Here in the world's highest, most dramatic mountains, snow and ice are melting earlier and faster than usual and this is causing more avalanches. And as melting continues, enormous quantities of water are entering the great rivers of India and Bangladesh. These are already rising and causing floods. Let's move now to South-East Asia. There, a big storm with heavy rainfall of over 700 mm and wind speeds as high as 120 kph has smashed into the Philippines. It isn't as violent as some other storms, but it's bad enough to cause many problems. Mudslides on steep hills have destroyed many homes and worse is expected. Emergency workers are moving people away from more dangerous areas to places of safety
